Serial No. 09/760,205

CLAIMS LISTING 3/18/04

RDID 0013 US

What is claimed is:

- 1-17 (previously cancelled)
- 18. (currently amended) An aqueous solution comprising a hydrogen-accepting coenzyme selected from the group consisting of NAD, NADP and derivatives thereof, and one or more compounds selected from the group consisting of organic compounds or salts thereof having a pKa value between 1.5 and 6.0, and nitrogen compounds of the formula

$$R^{1}-O-N_{R^{3}}^{R^{2}}$$

in which R¹, R² and R³ are the same or different and denote hydrogen or a saturated or unsaturated alkyl or aryl group, the solution characterized by-the absence of glucose 6 phosphate dehydrogenase having a pH between about 2.0 and 4.0.

- 19. (cancelled)
- 20. (currently amended) The solution of claim 49 18 wherein the concentration of the citric acid or citrate salt is about 5 to 200 mM.
- 21. (cancelled)
- 22. (original) The solution of claim 18 wherein the nitrogen compound is a hydroxylamine derivative or salt thereof.
- 23. (original) The solution of claim 22 wherein the concentration of the hydroxylamine derivative or salt is between about 2 and 300 mM.

Serial No. 09/760,205

CLAIMS LISTING 3/18/04

RDID 0013 US

- 24. (cancelled)
- 25. (cancelled)
- 26-45 (cancelled)
- 46-53 (previously cancelled)
- 54. (new) An aqueous solution comprising a hydrogen-accepting coenzyme selected from the group consisting of NAD, NADP, and derivatives thereof, one or more compounds selected from the group consisting of organic compounds or salts thereof having a pKa value between 1.5 and 6.0, and a nitrogen compound of the formula

$$R^{1}-O-N$$
 R^{3}

in which R¹, R², and R³ are the same or different and denote hydrogen or a saturated or unsaturated alkyl or aryl group, the solution characterized by remaining qualitatively unchanged following storage at about 2° to 8°C for 15 months.
